The PE & Sports Project uses elite level coaching practice, to provide the children with a fun, engaging, successful and positive experience.

We use our advanced 'exploration-discovery-competition' model to give the children the independence and responsibility to think and to solve problems for themselves whilst supporting and encouraging their development in a wide range of different sports.

On top of the highest-quality instruction for the sport itself, the children learn social-emotional skills and awareness in their self-management, self-awareness, social awareness, relationship skills and responsible decision-making.
