## Reading

- Explain the meaning of new vocabulary within the context of the text.
- Demonstrate active reading strategies e.g. challenging peers with questions, justifying opinions, responding to different viewpoints within a group.
- Provide reasoned justifications for their views.
- Through close reading, re-read and read ahead to locate clues to support understanding and justify with evidence from the text.
- Skim for gist.
- Scan for key information e.g. identify words and phrases which tell you the character is frustrated, or find words/phrases which suggest that a theme park is exciting.
- Use a combination of skimming, scanning and close reading across a text to locate specific detail.
- Retrieve, record, make notes and present information from non-fiction, including texts used in other subjects.
- Explain the effect on the reader of the author's choice of language and reasons why the author may have selected these words, phrases and techniques.

## Writing

- Use subordinate clauses to write complex sentences.
- Use passive voice where appropriate.
- Use expanded noun phrases to convey complicated information concisely (e.g. the fact that it was raining meant the end of sports day).
- Evidence of sentence structure and layout matched to requirements of text type.
- Use:
  - Semi-colon, colon, dash to mark the boundary between independent clauses.
  - Correct punctuation of bullet points. Hyphens to avoid ambiguity.
  - Full range of punctuation matched to requirements of text type.
- Use wide range of devices to build cohesion within and across paragraphs.
- Use paragraphs to signal change in time, scene, action, mood or person.
- Legible, fluent and personal handwriting style.

## **Mathematics**

- Read, write, order and compare numbers up to 10 000 000 and determine the value of each digit.
- Identify the value of each digit to three decimal places.
- Identify, represent and estimate numbers using the number line.
- Order and compare numbers including integers, decimals and negative numbers.
- Find 0.001, 0.01, 0.1, 1, 10 and powers of 10 more/less than a given number.
- Round decimals with three decimal places to the nearest whole number or one or two decimal places.
- Multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places.
- Use negative numbers in context, and calculate intervals across zero.
- Describe and extend number sequences including those with multiplication and division steps, inconsistent steps, alternating steps and those where the step size is a decimal.
- Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method).
- Recall and use addition and subtraction facts for 1 (with decimals to two decimal places).
- Perform mental calculations including with mixed operations and large numbers and decimals.
- Add and subtract whole numbers and decimals using formal written methods (columnar addition and subtraction).
- Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.
- Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method).
- Perform mental calculations, including with mixed operations and large numbers.
- Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication.
- Multiply one-digit numbers with up to two decimal places by whole numbers.
- Divide numbers up to 4 digits by a two-digit whole number using the formal written methods of short or long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.
- Use written division methods in cases where the answer has up to two decimal places.
- Solve problems involving all four operations, including those with missing numbers.
- Use common factors to simplify fractions; use common multiples to express fractions in the same denomination.
- Recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.
- Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.
- Multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. 1/4 x 1/2 = 1/8)
- Draw 2-D shapes using given dimensions and angles.
- Recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.
- Find unknown angles in any triangles, quadrilaterals, regular polygons.
- Describe positions on the full coordinate grid (all four quadrants).
- Express missing number problems algebraically.
- Find pairs of numbers that satisfy an equation with two unknowns.
- Use, read and write standard units of length, mass, volume and time using decimal notation to three decimal places.
- Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate.
- Interpret pie charts and line graphs.

## End of Year Expectations for Year 6

- This booklet provides information for parents and carers on the end of year expectations for children in our school.
- The staff, following the new National Curriculum statutory guidance, have identified these expectations as being the minimum requirements your child must meet in order to ensure continued progress throughout the following year.

All the objectives will be worked on throughout the year and will be the focus of direct teaching. Any extra support you can provide in helping your children to achieve these is greatly valued.

If you have any queries regarding the content of this booklet or want support in knowing how best to help your child please talk to your child's teacher.
